PROFESSIONAL SUMMARY

Laravel backend developer with hands-on experience building accounting systems, CMS platforms, booking workflows, role-based applications, and REST APIs. Experienced in manual deployments on shared hosting, working with production environments, and collaborating within senior-led codebases. Strong in Laravel architecture, authentication, API documentation, email workflows, and business-driven backend logic.

TECHNICAL SKILLS

Backend: PHP 8+, Laravel, REST APIs, Sanctum, Mailables, Middleware, Policies

Database: MySQL, PgSql, Migrations, Eloquent ORM, Complex Relationships

Frontend: Blade Templates

Auth & Security: Role-based access control)

APIs & Tools: Postman, Swagger / OpenAPI, Git, GitHub

Deployment & Hosting: cPanel, SSH (basic), Shared Hosting Deployment

Other: Datatables, Observer Pattern, Maatwebsite Excel

PROFESSIONAL EXPERIENCE

Laravel Developer (Intern)

Elit Nepal | 3 Months

- Contributed to a **new inventory management system** targeted at small production businesses.
- Implemented CRUD operations for inventory, products, and records using Laravel.
- Worked with senior developers while following production workflows and coding standards.
- Gained hands-on experience with **real client-oriented Laravel applications**.

Laravel Developer

Realm Infotech Pvt. Ltd.

- Independently developed an **accounting & record-keeping system** managing income, expenses, and ledgers.
- Implemented the **Observer Pattern** to automatically sync income and expense records into ledger entries.
- Built **employee transaction tracking** within the accounting module.
- Implemented **automatic financial calculations** based on filtered income and expense data.
- Added **Excel export functionality** using Maatwebsite Excel.
- Developed a **CMS for the company's official website**.
- Handled **manual deployment on shared hosting (cPanel)** and resolved environment-related issues.

KEY PROJECTS

Travel & Tour Company CMS

- Developed a CMS to manage **tour, trekking, and travel packages** with categorized listings.
- Implemented **package booking workflow with email notifications** using Laravel Mailables.
- Built admin dashboards using **server-side Datatables**.
- Managed hero sections, featured items, and package visibility from the backend.
- Deployed the application on **shared hosting**, configuring public directory correctly.

Manpower / Recruitment CMS

- Built job and job-category management modules.
- Implemented **role-based access control** (Admin, Employee, Guest).
- Developed applicant flow allowing users to apply for jobs and admins to track applications.
- Structured backend logic to track applied jobs and applicant data.

Hotel Website CMS (Production Codebase)

- Worked on an existing Laravel CMS maintained by senior developers.
- Integrated booking workflows with **email notification system**.
- Implemented and tested **Laravel Mailables** within a live production environment.
- Participated in **API testing and backend verification** using Postman.
- Assisted with deployment-related adjustments in **public_html** and **Laravel public directory mapping**.

Learning Management System – API Development

Laravel Backend | Next.js Frontend (Team Project)

- Contributed to **REST API development** consumed by a Next.js frontend.
- Tested and validated APIs using **Postman**.
- Assisted in documenting APIs using **Swagger (OpenAPI)**.
- Collaborated with frontend developers to align API responses and authentication flows.

EDUCATION

Bachelor of Computer Application (BCA)
Tribhuvan University (TU)
